

SILVER SAGE HEALTH CARE INDEPENDENCE AGREEMENT

Intent:

As a senior cohousing community, we realize that eventually we all will experience disability and death. While we work to share about resources and to create an environment that fosters caring and supportive relationships with one another, residents must be able to live independently and/or be entirely responsible for their own health and personal care needs.

Agreement

We are a community of active adults who share a desire to create an environment that fosters caring and supportive relationships with each other.

Our homes are independently owned.

The community at large provides no formal health care assistance or services.

Because the community provides no formal health care assistance or services, members must be able to live independently and/or be entirely responsible for their own health and personal care needs, as required.

Any health care arrangements made between individual members are not the responsibility of the community at large, nor can the community and/or the Homeowners Association be held responsible for those arrangements.
